InterLFEE

LFEE Europe and Interacting+ (InterLFEE) combine expertise in areas such as language teaching and learning, resource development, CLIL methodology, drama and leadership to create unique, engaging and meaningful training opportunities.

We are Europe's leading course provider for innovation in learning. Our courses are creative, relevant and practical. Our locations offer culture, creativity and communication in Ireland, Spain, France, Germany, Italy and more!

We promote drama, technology and wellbeing in the classroom through an interactive and entertaining methodology. We offer tailor-made courses for teachers, school leaders, advisors, inspectors and Local Authorities and are happy to develop new courses to meet everyone's needs.

Our team of trainers are experts in their fields and offer a variety of inspirational learning concepts with detailed guidance on 'how to' bring them to the classroom.

BORN TO LEARN!

LIFELONG LEARNING ●

InterLFEE courses are designed to satisfy the need for our participants to learn both in the personal and professional realm. In our courses, we create a learning environment which builds communities lasting beyond the dates of the training. Our training programmes act as models, the manner and the content of what we learn is instantly transferable.

A strong group dynamic within a “safe” environment allows teachers to put themselves in the position of their students and to try out new techniques.

Result: new skills that both enhance the teaching delivery and motivates the learners.

TECHNOLOGY

InterLFEE courses connect with the most relevant and recent digital teaching tools. We work with our own secure platform for storage of course materials and facilitation of communication around course content and community building.

During the course we capture and share (memories of) activities, how we create our learning community and friendships.

We model the effective use of resources and create opportunities for participants to practice both during and after their course.

OUTCOMES

Enhancing teachers' skills, confidence and competence in communication, literacy and ICT.
